

Mohammad Habibi

FULL-STACK WEB DEVELOPER

Profile

I'm a Full-Stack Web Developer with experience in back-end frameworks such as Laravel, and nestjs, front-end frameworks including ReactJs, and NextJs, and React Native for mobile development. I also have experience with notable SQL and NoSQL databases such as MySQL, and MongoDB. I also have some personal experiences in ML. I completed a Bachelor's degree in computer engineering and am Currently a Student of Master's Degree in Cyber Security. I want to leverage my expertise to drive innovative solutions in a dynamic team environment.

Employment History

Full-Stack Web Developer, YektaErtebat, Kerman

MARCH 2021 – SEPTEMBER 2023

As a Full-Stack Web Developer at YektaErtebat, I was responsible for designing, developing, and maintaining web applications such as Kasbify, Asia Health Care Insurance System, and 1Tekan which are explained in detail as follows:

- I was in the core development team of Kasbify.com web application which is an online store management and CRM system created in multiple sections and micro services mainly developed in Laravel and Vue Js and a part of it in NextJS, and MySQL as database. I also created a desktop extension in c# wpf.
- I was in the core development and maintenance team of Asia Health Care Insurance System developed in Laravel.
- I was in the mobile app and PWA development team of 1Tekan Fitness application using React Native and NextJs.
- Besides, I was on the development team of other smaller applications and sub-applications.

Additionally, I tried my best to maintain clean coding, use modern technologies and the full potential of frameworks, and implement best practices.

- Collaborated in brainstorming and solving both technical and logical challenges.
- Collaborated with cross-functional teams to gather project requirements and translate them into effective technical solutions.
- Implemented responsive web designs to ensure optimal user experience across various devices and screen sizes.
- Contributed to database design and optimization, enhancing the overall performance of web applications.
